

Visit to Bournemouth Water HQ, 20 October 2015

Members and their partners visited the Head Offices in Bournemouth, where, after refreshments, they were given a talk in the Board Room by the Production Manager, Scott Glover.

The talk was very interesting and provoked several questions, after which they were given a tour of the control room and filtration facilities (a new UV system has just been installed at a cost of £3M).

The party then adjourned to the nearby Miller & Carter Restaurant for lunch.
